

- New low-GWP R-454B lineup featuring high efficiency, delivering up to 19 SEER2 and 10 HSPF2 (Region IV).
- Compatible with EQHub Smart Thermostat, standard thermostats, or home automation systems.
- Hyper Heat DC Inverter Rotary Compressor rated to operate at -30°C (-22 °F) and approved for cold climate operations.
- Heat Pumps are side condensing with smaller footprint for narrow spaces.
- Variable inverter compressor and vapor injection technology can achieve 100% heating capacity at -20°C/-5°F and 100% cooling at 46°C /115°F.
- Widest operating range condition in the category.
- Premium Series Heat Pumps matched with furnace or air handlers are Energy Star rated for Cold Climatic conditions. Check local Qualified Product Lists for additional rebate programs.
- The Air Handler Unit and ccASHP unit feature an Electronic Expansion Valve for precision control and enhanced efficiency.

The Premium Series Heat Pump provides an efficient, cost-effective way to heat and cool your home up to 12 months of the year. When paired with a furnace, the combined unit will function as a hybrid heat system resulting in energy cost savings.

TECHNICAL SPECIFICATIONS

PREMIUM CENTRAL HEAT PUMP SERIES

FEATURES AND BENEFITS

- Compatible with EQHub Smart Thermostat, standard thermostats, or home automation systems.
- Hyper Heat DC Inverter Rotary Compressor rated to operate at -30°C (-22 °F) and approved for cold climate operations.
- Heat Pumps are side condensing with smaller footprint for narrow spaces.
- Variable inverter compressor and vapor injection technology can achieve 100% heating capacity at -20°C/-5°F and 100% cooling at 46°C /115°F.
- Widest operating range condition in the category.
- Premium Series Heat Pumps matched with furnace or air handlers are NEEP certified and listed on NRCan Greener Home program as Cold Climate Air Source Heat Pump systems. Check local Qualified Product Lists for additional rebate programs.

ENVIRONMENTALLY RESPONSIBLE

The Premium Series Heat Pump provides an efficient, cost-effective way to heat and cool your home up to 12 months of the year. When paired with a furnace, the combined unit will function as a hybrid heat system resulting in energy cost savings.
